Rajat Tiwari @ ORACLE 3.5+ YoE

Rajattiwari.codes@gmail.com | Delhi, India | +91-7827396170 | LinkedIn

Results-driven Software Developer & DevOps Engineer with 3+ years of experience at Oracle, combining backend development and cloud-native automation expertise. Demonstrated success in reducing deployment time by 40%, optimizing CI/CD pipelines, and building scalable applications using Python, Django, and Java. Skilled in microservice architecture, containerized deployments (Kubernetes, Docker), and automation that enhances system efficiency and reliability. Passionate about engineering clean, maintainable solutions, solving complex problems, and driving continuous improvement across the software lifecycle.

Experience : Staff Consultant, Oracle | Noida, India | 07/2022 – Present - 3+ Years

1. **Cloud & DevOps Engineering:** Spearheaded the development and deployment of cloud-native applications on OCI, achieving a 40% reduction in deployment time through optimized CI/CD pipelines using Jenkins and GitLab.
2. **Kubernetes & Containerization:** Led the refactoring of monolithic applications into microservices, enhancing system modularity and fault tolerance. Managed Kubernetes clusters to ensure high availability and scalability.
3. **Automation & Security:** Developed and managed automated CI/CD workflows, integrating security best practices and vulnerability assessments, significantly reducing mean time to resolution for incidents.
4. **Collaboration & Mentorship:** Collaborated with cross-functional teams to deliver robust solutions and mentored junior developers in best practices, fostering a culture of continuous improvement.
5. **Project Highlights:** Successfully developed a Django-based internal ticketing system and implemented enterprise-grade security measures, ensuring compliance and performance.

Project 1 : Django-Based Internal Workflow System (Development) *Company: Oracle*

- Developed and deployed a secure, modular Django-based platform to streamline internal operations, including task tracking and workflow management across engineering teams.
- Engineered scalable RESTful APIs using Django ORM, seamlessly integrating Oracle SQL for structured data storage and implementing robust authentication and permission schemes.
- Enabled key features such as ticket lifecycle management, role-based access control, email notifications, and analytics dashboards for SLA monitoring.
- Conducted comprehensive performance tuning and enterprise-grade security hardening, including input validation, CSRF/XSS protection, and session management, to meet Oracle's internal infosec standards.

Project 2 : *Enterprise CI/CD Automation on Oracle Cloud Infrastructure (Technical Consultant)* *Company: Oracle*

- Developed a comprehensive CI/CD pipeline leveraging Jenkins and GitLab to automate the build, test, scan, and Helm-based Kubernetes deployment of enterprise applications on OCI.
- Designed Docker-based Jenkins agents with OCI-compatible networking, integrating Git, Podman, and secure credential management for scalable and efficient pipeline execution.
- Automated the deployment of critical enterprise applications such as Oracle BRM, Siebel CRM, and BI Publisher, including integration of keystore/truststore setup, Active Directory authentication, and OCI Load Balancers.
- Enabled comprehensive observability by deploying Fluent Bit via Helm as a DaemonSet in Kubernetes, enhancing full-stack logging and monitoring for better issue traceability and performance insights.

Education : B. Tech - GBPEC, GGSIPU Delhi IN *CGPA: 8.18 | 08/2018 – 07/2022*

- Led the Entrepreneurship Cell as Vice President in the final year, organizing events and fostering innovation among peers.
- Served as a T&P Coordinator, bridging the gap between students and potential employers, and contributing to placement initiatives.
- Authored an IEEE paper on "Enabling IoT in Every Household," showcasing research and innovation.
- Actively participated in the Personality Development Club, mentoring juniors and contributing to their growth.

Core Skills :

- **Languages & Frameworks: Python (Django), Java (JDK 1.8+), Spring Boot, JavaScript**
- **Cloud & Containerization: Oracle Cloud (OCI), AWS, Kubernetes (OKE), Docker, Terraform**
- **DevOps & Automation: Jenkins, GitLab CI/CD, Ansible, Shell Scripting**
- **Monitoring & Security: Grafana, Prometheus, EFK, Secure Coding Practices**

Certifications & Achievements :

- **Oracle Certified:** 10 times OCI Certified with major : OCI Architect Associate, Cloud Infrastructure DevOps OCA, AI OCA , Java SE17 .
- **Awards:**
  - Awarded **Technical Achiever FY25Q2** for contributions to cloud-based customer-specific development.
  - Recognized as **Global Delivery Top Consultant FY24Q1** for driving innovation in infrastructure automation.
- **Trainings & Knowledge Sharing:** Conducted **fundamental & advanced training** sessions on DevOps, cloud technologies, and OCI.
- Core Competencies: **Strong problem-solving, analytical thinking, and teamwork skills, with a focus on continuous learning and innovation**

⇒ Strong problem-solving, analytical thinking, and teamwork skills with a focus on collaboration and leadership. Adaptable and committed to continuous learning to drive innovation and efficiency.
